Section 1
Identification

Chemical Product Name/Identifier
SKYBOND® 700 Polyimide Resin

CAS Number
Mixture

Trade Names and Synonyms
Solution of aromatic polyimide precursor in ethanol and n-methyl pyrrolidone (NMP)

Recommended Use and Restrictions on Use
Polyimide Resin

Company Information
Industrial Summit Technology Corporation
250 Cheesequake Road
Parlin, NJ 08859

Telephone
Product and Sales Information: 732-238-2211

Emergency Phone
CHEMTREC: 1-800-424-9300

Section 2
Hazards Identification

OSHA HCS Status
This product is a hazardous chemical, as defined by OSHA at 29 CFR 1910.1200. Hazards identified are based on hazards of the ingredients.

Relevant Route of Exposure/Target Organs
Dermal, Eyes, Inhalation, Respiratory System

OSHA/GHS Signal Word and Hazard Statements
DANGER: Flammable liquid and vapor. Causes skin irritation. Causes eye irritation. Toxic in contact with skin. May cause an allergic skin reaction. Suspected of causing genetic defects. May damage fertility of the unborn child. Causes damage to organs (respiratory system). May damage organs (liver, kidney, blood) through prolonged or repeated exposure. Harmful if inhaled. Toxic if swallowed. May be fatal if swallowed and enters airways. May cause cancer. Harmful to aquatic life with long lasting effects.

OSHA/GHS Classification and Pictograms
Flammable liquid (Category 3) H226
Acute toxicity, inhalation (Category 3) H331
Acute toxicity, oral (Category 3) H302
Acute toxicity, dermal (Category 3) H311
Skin irritation (Category 2) H315
Eye irritation (Category 2A) H319
Skin sensitization (Category 1) H317
Germ cell mutagenicity (Category 2) H341
Aspiration hazard (Category 1) H304
Carcinogenicity (Category 2) H351
Reproductive toxicity (Category 1B) H360
Specific target organ toxicity - single exposure (Category 3, respiratory system) H335
Specific target organ toxicity - repeated exposure (Category 2, liver) H373
Acute aquatic toxicity (Category 2) H401
Chronic aquatic toxicity (Category 2) H411

For the full text of the H-Statements mentioned in this Section, see Section 16

OSHA/GHS Precautionary Statements
Prevention
Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces.— No smoking. Keep container tightly closed. Ground/Bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge.

Wear protective gloves/eye protection/face protection specified in Section 8.
Wash hands and exposed skin thoroughly after handling. Wear protective gloves, eye and face protection.
Avoid breathing mist, vapors, and spray. Use only outdoors or in well-ventilated area. Obtain special instructions before use.
Contaminated work clothing must not be allowed out of the workplace.

Response
In case of fire: Use water spray, foam, dry chemical, carbon dioxide, or any Class B extinguishing agent.
If exposed or concerned: get medical advice/attention.
If on skin (or hair): Take off immediately all contaminated clothing and wash it before reuse. Wash skin with plenty of water/shower. Specific treatment: see Section 4 for First Aid instructions. If skin irritation or rash occurs: Get medical advice/attention. Call a poison center/doctor if you feel unwell.
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting. Rinse mouth.
If inhaled: Remove person to fresh air and keep comfortable for breathing. Call a poison center/doctor if you feel unwell.

**Storage**

**Disposal**
Dispose of contents/container in accordance with local/regional/national/international regulations.

**GHS Hazard and Precautionary Statement Codes**
See Section 16.

### Section 3

### Section 4
**First-Aid Measures**

**Skin Contact**
Immediately wash skin with soap and water. Remove contaminated clothing. Get medical attention. Wash contaminated clothing before reuse.

**Eye Contact**
Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.

**Inhalation**
Remove person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, get medical attention. Remove material from eyes, skin, and clothing.
**Ingestion**
Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

**Most Important Symptoms/Effects**
Skin and eye irritation. May cause respiratory irritation or distress. May cause cancer and damage fertility or the unborn child. Repeated or prolonged contact may cause allergic skin reaction in some people. May cause liver damage.

**Indication of Immediate Medical Attention and Special Treatment Needed**
Get medical attention immediately if product comes into contact with skin or eyes, or if it is inhaled or ingested.

---

**Section 5**
**Fire-Fighting Measures**

**Extinguishing Media**
water spray, foam, dry chemical, carbon dioxide, or any Class B extinguishing agent.

**Hazardous Combustion Products**
Oxides of carbon produced when burned.

**Protective Equipment**
Firefighters and others who may be exposed to products of combustion (see Hazardous Decomposition Products in Section 10) should be equipped with self-contained breathing apparatus and full protective gear. Equipment should be thoroughly decontaminated after use.

**Fire Fighting Procedures/Precautions**
Keep away from heat/sparks/open flames/hot surfaces. Keep personnel removed and upwind of fire. Closed containers exposed to heat may build up pressure. Use water spray to keep exposed containers and equipment cool. Use water spray to cool containers and tanks.

---

**Section 6**
**Accidental Release Measures**

**Personal Precautions**
Review Firefighting Measures and Handling sections before proceeding with clean up. Take precautions to avoid eye, skin, and respiratory exposure. Should exposure occur, see Section 4 for first aid measures. Flammable vapors can accumulate in low areas and form explosive concentrations.

**Protective Equipment**
Use appropriate personal protective equipment during clean up. See Section 8.

**Emergency Procedures**
Maintain adequate ventilation. Shut off all sources of ignition. No heat, sparks, or flame in the area.
Methods/Materials for Containment and Cleaning Up
Dike spill. Remove sources of sparks, flame, or hot surfaces. Absorb spill with commercial absorbent material and place in suitable containers for disposal. Dispose of as hazardous waste (see section 13). Do not discharge into waterways or sewer systems without proper authority. Dispose of in accordance with government regulations.

Section 7
Handling and Storage

Precautions
Avoid breathing vapors or mist. Avoid contact with eyes, skin, or clothing. Wash thoroughly after handling. Do not store or consume food, drink or tobacco in areas where they may become contaminated with this material. Keep away from heat, sparks and flames.

Storage
Keep container in a cool place. Store below 50 C (122 F). Keep container tightly closed. Store in accordance with National Fire Protection Association recommendations.

Section 8
Exposure Controls/Personal Protection

Exposure Limits

Engineering Controls
Use ventilation that is adequate to keep employee exposure to airborne concentrations below recommended exposure limits. Provide natural or mechanical ventilation to control exposure levels below airborne exposure Limits (see section 6 above). If practical use, use local mechanical exhaust ventilation at sources of air contamination such as open process equipment. Consult NFPA Standard 91 for design of exhaust system.

Personal Protection Measures/Equipment

Skin Protection
Wear appropriate chemical resistant gloves and clothing to prevent skin contact. Consult glove manufacturer to determine appropriate type of glove for given application. Wear chemical safety goggles, a face shield and a chemical resistant apron when splashing is likely. Wash immediately if skin is contaminated. Remove contaminated clothing promptly and launder before reuse. Clean protective equipment before reuse. Provide a safety shower at any location where skin contact can occur. Wash hands and exposed skin thoroughly after handling. Repeated or prolonged contact may cause allergic skin reaction in some people.

Eye Protection
Wear eye and face protection. Wear chemical goggles that meet ANSI Z87 standards and/or are tested and approved under appropriate government standards. Eyewash stations should be easily accessible.

Respiratory Protection
Avoid breathing vapor and/or mist. Use NIOSH/MSHA approved respiratory protection equipment (full face piece recommended) when airborne exposure limits (see below) are exceeded. If used, full face piece replaces need for face shield and chemical goggles. Consult respirator manufacturer to determine the appropriate type of equipment for given application. Observe respirator use limitations specified by NIOSH/MSHA or the manufacturer. Respiratory protection programs must comply with 29 CFR 1910.134.

Section 9
Physical and Chemical Properties

Appearance (physical state, color, etc.)
Brown viscous liquid
Odor
Amine-like

Odor Threshold
Not known

pH
Not known

Melting Point/Freezing Point
Not known

Initial Boiling Point
Not known

Flash Point
120°F

Evaporation Rate
Not known

Flammability
Flammable liquid

Upper/Lower Flammability or Explosive Limits
Not known

Vapor Pressure
24 mm Hg

Vapor Density
3.23

Relative Density/Specific Gravity
1.15 – 1.18

Solubility
Slight in water

Partition Coefficient
Not known

Auto-ignition Temperature
Not known

Decomposition Temperature
Not known
Viscosity
2,500-7,000 cps at 25°C

% Volatiles
Not known

Solids after Cure
46%

Note
This physical data are typical values based on material tested by may vary from sample to sample. Typical values should not be considered as a guaranteed analysis of any specific lot or as a specification for the product.

Section 10
Stability and Reactivity

Reactivity
Not known

Chemical Stability
Not known

Hazardous Reactions
Not known

Conditions to Avoid

Incompatible Materials
Strong oxidizing agents, strong alkali

Hazardous Decomposition Products
Carbon monoxide, nitrogenous products

Hazardous Polymerization
Does not occur

Section 11
Toxicological Information

Relevant Route of Exposure/Target Organs
Dermal, Eyes, Inhalation, Respiratory System
Symptoms
Causes skin irritation. Causes serious eye irritation. Toxic if inhaled. May cause respiratory tract irritation. May damage fertility or the unborn child.

Delayed and Immediate Effects
Eye effects
N-methyl-2-pyrrolidone
Eye contact with the liquid or vapor may initially result in irritation with discomfort, tearing, or blurring of vision. Low vapor concentrations caused eye irritation in some individuals.

Skin effects
Skin contact may initially result in irritation with discomfort or rash.

N-methyl-2-pyrrolidone
Human experience has demonstrated severe dermatitis (blistering, cracking, edema, redness) upon prolonged or repeated skin contact. There are inconclusive or unverified reports of human sensitization.

Respiratory effects
Inhalation may result in irritation of the upper respiratory passages, with coughing, discomfort and headache.

Health Effects Summary
Chronic Effects (Following Short and Long Term Exposure)
The following information summarizes experience and results of scientific investigations reviewed by health professionals for hazard evaluation of SKYBOND® 700 polyimide resin and development of Precautionary Measures and Occupational Control Procedures recommended in this document. Industrial Summit Technology Corp has not conducted studies on SKYBOND® 700 polyimide resin and no data was obtained in a search of the available scientific literature. However, toxicity information is available on representative polyimide resins.

Inhalation and skin contact are expected to be the primary routes of occupational exposure of SKYBOND® 700 Polyimide Resin.

Occupational exposure to this material has not been reported to cause significant adverse human health effects. However, SKYBOND® 700 polyimide resin is considered to cause severe eye irritation based on animal studies. The organic solvents described below, have been reported to cause eye, skin and respiratory tract irritation and may contribute to the health effects of this material. These solvents also possess narcotic-like properties; excessive exposure may result in headache, dizziness, in coordination, nausea, loss of appetite and loss of consciousness.

Toxicological Data
Single exposure (acute) animal studies conducted on representative polyimide resins indicate that these materials are slightly toxic orally (rats) and practically nontoxic after skin application (rabbits). They range from practically nonirritating to moderately irritating to rabbit skin and moderately irritating to corrosive to rabbit eyes.
Data from Industrial Summit Technology Corporation, studies, and from the available scientific literature on the components of SKYBOND® 700 polyimide resin which have been identified under the criteria of the OSHA Hazard Communication standard (29 CFR 1910.1200) are discussed below.

**Meta-phenylendianiline (m-PDA)**
Meta-phenylenediamine (m-PDA) is used in the production of this polyimide resin. Single-dose (acute) animal studies indicate that m-PDA is moderately toxic orally (rats) and inhalation (rats) and slightly toxic after skin application (rabbits). It is moderately irritating to rabbit eyes and skin. Allergic skin reactions have been reported in various laboratory animals repeated skin application tests. Rats given this material orally for 90 days showed increased liver and kidney weights and liver damage.

No significant increase in tumors were reported in a drinking water study (mice, 78 weeks), skin painting study (mice 24 months), or long term feeding study (rats, mice). No birth defects were reported in rats given this material orally during pregnancy, even at levels which produced toxic effects to the mother.

Adverse genetic effects have been reported in standard tests using bacterial and animal cells. Both positive and negative genetic changes were reported in standard tests using animals. No adverse genetic changes were reported in standard tests with human cell cultures and insects.

**n-Methyl Pyrrolidone (NMP)**
Human experience indicates that continued or gross skin contact with NMP produces irritation, redness, and defatting of the skin. Inhalation of very high concentrations of NMP may result in headache, giddiness, nausea, and mental confusion. Repeated dosing of laboratory animals with NMP has been reported to cause changes in organ weights and blood composition, reduced response to sound, and breathing difficulty at a dosage which produced death. No skin allergy was observed in guinea pigs following repeat skin exposure. Long-term inhalation (2 years) of NMP produced no increase in tumors in rats and NMP did not show Tumor initiating activity in a mouse skin painting study. Birth defects were reported following dermal application of NMP to rats at amounts which produced adverse effects on the mother and following intraperitoneal injection in two strains of mice. No birth effects were reported in rats exposed to NMP by inhalation. No effects were seen on the ability of rats to reproduce when exposed to NMP for two successive generations, although toxic effects were reported in offspring at levels which produced adverse effects on the mother. NMP has produced no genetic changes in standard tests using animal and bacterial cells.

**Ethanol**
Swallowing of ethanol also causes central nervous system effects and digestive tract effects; large amounts may cause respiratory failure leading to death. Other effects of ethanol related to repeated intake of alcoholic beverages including nutritional deficiencies, liver, and pancreas damage and secondary blood cell changes. Repeated consumption of ethanol (alcoholic beverages) by pregnant women is reported to produce adverse effects on the development of their offspring ("fetal alcohol syndrome").

Single-dose (acute) animal studies indicate that ethanol is practically non-toxic orally (rats), after skin application (rabbits) and after inhalation (rats). It is mildly to severely irritating to rabbit eyes and practically nonirritating to moderately irritating to rabbit skin. It is practically non-toxic by inhalation (Rat LD50-20,000 ppm, 10-hr. exposure). Various morphological functions and biochemical changes including changes in the heart muscle, liver, CNS, and blood cells have been reported for experimental animals given ethanol orally. Repeated inhalation exposures produced liver damage in rabbits, while other treatment-related effects were reported in pigs, dogs, and monkeys. Rats exposed by skin application to a 50/o/o solution of ethanol showed only temporary skin irritation. Several species of laboratory animals have been exposed to
ethanol by various routes to determine effects on an offspring. While susceptibility varies with each species, birth defects have been consistently reported in many of the species tested (mouse, rat, pig, guinea pig, monkey). Ethanol produced genetic changes in standard tests using human volunteers and animals and yeast cells. No genetic changes were reported in standard tests using bacterial or animal cells, negative responses were reported in assays using human cells.

Ethanol in alcoholic beverages is listed as a substance which is “carcinogenic to humans” by the International Agency for Research on Cancer (IARC Monographs Vol. 44). This IARC listing is based on evidence of carcinogenicity of alcoholic beverages following long-term consumption of alcoholic beverages. Epidemiological studies report increased incidence of mouth and throat cancer in humans after long-term consumption of alcoholic beverages. Higher risk is associated with the drinking of dark liquors and for smokers who consume alcoholic beverages.

Methanol
In addition to the effects noted, significant swallowing of methanol also causes central nervous system effects and possible damage to the kidneys. Temporary or permanent visual disturbances are commonly seen with methanol poisoning in man, although permanent loss of vision is generally associated with poisoning following swallowing. Initial visual symptoms include blurring or dimness, changes in color perception, pain and tenderness, and dilated unreactive pupils.

Carcinogenicity
Methyl isobutyl ketone; IARC Group 2B: Possibly carcinogenic to humans
Other components of this product are not classified by NTP, IARC, or OSHA as carcinogens.

Section 12
Ecological Information

96-hr LC50 Bluegill Sunfish
380 mg/l, Practically Non-Toxic

96-brLC 50 Rainbow Trout
340 mg/l Practically Non-Toxic

**GHS Label Hazard Statement Codes**

Signal Word: DANGER

- H226 Flammable liquid and vapor
- H302 Harmful if swallowed
- H304 May be fatal if swallowed and enters airways
- H311 Toxic in contact with skin
- H315 Causes skin irritation
- H317 May cause an allergic reaction.
- H319 Causes serious eye irritation
- H331 Toxic if inhaled
- H335 May cause respiratory irritation
- H351 Suspected of causing cancer
- H360 May damage fertility or the unborn child
- H373 May cause damage to organs through prolonged or repeated exposure
- H401 Toxic to aquatic life
- H411 Toxic to aquatic life with long lasting effects

**GHS Label Precautionary Statement Codes**

- P201 Obtain special instructions before use.
- P202 Do not handle until all safety precautions have been read and understood.
- P210 Keep away from flames and hot surfaces. – No smoking.
- P233 Keep container tightly closed.
- P241 Use explosion-proof equipment.
- P242 Use non-sparking tools.
- P343 Take action to prevent static discharges.
- P260 Do not breathe dust/ fume/ gas/ mist/ vapors/ spray
- P264 Wash hands thoroughly after handling.
- P271 Use only outdoors or in a well-ventilated area.
- P272 Contaminated work clothing should not be allowed out of the workplace
- P273 Avoid release to the environment.
- P280 Wear protective gloves, eye and face protection.
- P281 Use personal protective equipment as required.
- P301+310 IF SWALLOWED: Immediately call a poison center/doctor.
- P302+P352 IF ON SKIN: Wash with plenty of soap and water.
- P303+P361:P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.
- P303+313 If exposed or concerned: Get medical advice/attention.
- P304+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position
comfortable for breathing.

**P305+P251+P338** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

**P307+P313** If exposed: Call a POISON CENTER or doctor/physician.

**P312** Call a POISON CENTER or doctor/physician if you feel unwell.

**P321** Specific treatment: In case of skin contact, immediately wash skin with soap and water. Remove and wash contaminated clothing before reuse.

**P331** Do NOT induce vomiting.

**P332+P313** If skin irritation occurs: Get medical advice.

**P337+P313** If eye irritation persists: Get medical advice.

**P361+P364** Take off immediately all contaminated clothing and wash it before reuse.

**P370+P378** In case of fire: Use water fog, dry chemical, foam, or CO2 for extinction.

**P403+P233+P235** Store in a well-ventilated place. Keep container tightly closed. Keep cool.

**P405** Store locked up.

**P501** Dispose of contents/container in accordance with local/regional/national/international regulations.
